Certificate

for compensated greenhouse gases

Solberga Gård
has offset 100.000 kg
of CO₂ greenhouse gases.

What does your climate protection contribution accomplish?

With your climate protection contribution you are supporting the following projects, among others:

Efficient stove systems for families in Nigeria

Your climate protection contribution pays for 25 stove systems. These save about 80% of energy.

Electricity generation from mustard seed crop residues in India

Your contribution provides 17 households with one year of renewable electricity.

Construction of biogas units for households in Kenya

Your climate protection contribution finances the construction of 5 Biogas domes.

atmosfair operates its projects according to the Clean Development Mechanism (CDM) outlined in the Kyoto Protocol as well as the "Gold Standard" established by international environmental organisations. Independent organisations approved by the United Nations (e.g. TÜV) audit the projects' actual CO₂ reductions.

By accepting donations, atmosfair commits itself to save emissions for the amount of greenhouse gases indicated by the donator, and to cancel the respective CERs in the official registry of Germany. This provides the evidence for the permanent reduction of emissions according to the rules of the Kyoto Protocol.
